Background/Supporting Information

Hennepin County has approved funding for lead reduction at 3733 Second Avenue South through their Environmental Response Fund. This dwelling is the site of lead poisoning in a child under the age of six. Lead risk assessment has been conducted and it has been determined that the soil and exterior surfaces of the building are lead contaminated and require remediation. The grant funds will be used to remediate these lead hazards. No matching funds are required for this award. Administrative costs will be borne by HUD Lead Hazard Reduction Grant funds.
